

REACHING NEW HEIGHTS

Ghafari is known around the world for creating state-of-the-art aviation facilities and systems that help passengers and businesses move forward.

GHAFARI

WHO WE ARE

Recognized among *ENR's* top 25 global airport designers, we use rigorous methodologies to streamline the aviation industry's toughest projects.

Our experience in the aviation industry spans the entire spectrum of airport facilities, from passenger terminals and aircraft maintenance hangars, to cargo centers and mission-critical facilities. Our approach is rooted in a strong understanding of each facility - from the role it plays in our clients' business to the way it fits within an existing airport environment. Based on this understanding, we elevate efficiency in project delivery, saving time and costs while minimizing interruptions to normal operations. Throughout the process, our integrated aviation group combines industry expertise with advanced methodologies to bring businesses goals, facility processes, and passenger needs into harmony.
