

**YOUR SPACE. YOUR STORY.**

**Our close attention to client needs and aesthetic details fosters inspiring and enriching interiors.**

**GHAFARI**

## WHO WE ARE

**We work closely with clients to design interiors that enhance their company culture and brand story.**

Windows, walls, hallways, doors - these common architectural features are extraordinary opportunities to impact a business purpose. Attract employees. Accommodate processes. Encourage collaboration. Inspire agility. Broadcast a brand and culture. Our integrated team looks closely at these details based on the business goals and vision of our client. We tap a wide range of interior capabilities to enrich spaces, from space planning and material selection to design and brand image development. Our integrated team of architects, designers, engineers, and construction experts combines perspectives to advance the basic notion of what interior design can achieve. Together, they bring stories to life through space.
